

Module II: Intermediate, Challenging neurological diagnosis, refining analytical skills and dysphagia management plans.

Thursday 14th November 2019, 33LT - 33 Queen Square, basement lecture theatre

Programme: Day Two

9.00-9.30am	Registration
9.30 – 10am	Radiological changes in neurological dysphagia pathophysiology: a refresher
10 – 11.15am	Approaches to analysis in VFS: oral phase (to include discussion around binary descriptors and scales and examples of clinically utilised approaches to analysis inc. MBSImP)
11.15 am – 11.30am	Coffee Break
11.30am-12.30pm	Approaches to analysis in VFS: pharyngeal phase (practical examples and opportunity for group rating/discussion using analysis approaches outlined above)
12.30 – 1.15pm	Lunch
1.15pm-2:45pm	Less common neurological presentations (including key radiological features of dysphagia; examples to include myotonic dystrophy, c-spine surgery, myasthenia gravis)
2:45-3.00pm	Coffee
3.00-4:00pm	Dysphagia strategies (radiological assessment of dysphagia strategies to include chin tuck, head turn, Mendolsohn, cough)
4.00-4.15pm	VFS diagnostic conundrum
4.15 – 4.30pm	Questions & close
